Gerica Brown, Assistant Dean for Inclusive Excellence Strategic

Initiatives

Michelle Strunks, Assistant Dean and Manager, Office of Student

Success

Engineering That Matters

We're focused on engineering that matters – providing students with the skills and knowledge needed to change the world, and the courage to do it.

From conducting research (<https://udayton.edu/engineering/research/>) and creating in the makerspace (https://udayton.edu/engineering/connect/innovation_center/makerspace/) to service learning (<https://udayton.edu/engineering/connect/ethos/>) and co-ops and internships (<https://udayton.edu/engineering/connect/cooperative-education/>), engineering majors have countless opportunities to gain practical experience and prepare for a meaningful career.
